**Our customers love the Shur Flow Gutter System:**

"The project manager gave me the lowest price out of the three estimates and the job looks great! I would definitely recommend this company to anyone."  
Michelle C. in Cherry Hill, NJ

"Their estimate was very close to half of the other 3 estimates I got. They arrived on time, completed on time and cleaned up after themselves."  
Theresa C. in Williamstown, NJ

"The men who did the estimate and the work were pleasant and completed the job within a few days of our original phone conversation."  
Terry H. in Glassboro, NJ

**How it works:**

The NUMBER ONE Gutter Protector™ incorporates a "solid top" which protects the gutter from falling debris and a louvered "front" which prevents leaves and pine needles from washing in along with the water. You can see why this is a big improvement over the many variations of the helmet type which have no way to filter out debris that sticks to the surface the same way the water does.
